

Car Top Fall Hazard Barricade

Safety for everyone in your building

The Car Top Fall Hazard Barricade is designed to protect the perimeter of the elevator car top.

Safety starts at the top

Life is a moving experience. But an accident can stop it in its tracks. That's why your safety and the safety of the people who use your building are the first priority at Schindler. It's also why we offer a number of additional safety product options, such as the Car Top Fall Hazard Barricade for elevators.

Car Top Fall Hazard Barricade for elevators

No matter if it's a technician, inspector or a riding passenger during evacuation, sometimes people have to be on top of the elevator, where one missed step can result in a fall down the hoistway. Schindler's Car Top Hazard Barricade — guardrails for the perimeter of the elevator car top — are a simple, cost effective solution that help you keep your building safer, avoid injury litigation and possibly lower your insurance premiums.

System summary

- Exceeds ANSI elevator and OSHA standards
- Encloses the entire elevator car top
- Universal design works with any elevator.

Your Schindler representative can give you full details on our Car Top Fall Hazard Barricade as well as other specialized safety products and training options to help make your building safer.

Schindler

Car Top Fall Hazard Barricade

Safety for everyone in your building

Safety is a fundamental value of Schindler. It is implicit in our products and services and in the way we work. One billion people move through life's experiences using our elevators and escalators every day, and we are committed to continuous improvement in product, employee and passenger safety. Our safety culture is the heart of why we are able to provide you with first-class service.
